To whom it may concern:

At the request of Eric Lim, Director-Spurtronic Pte Ltd, I have been asked to prepare this letter endorsing their product, Temperature Monitoring & Voice Call Alert System, Model VM500-5 SGP.

We have been using this system for the last seven months and this system has been proven to be able to monitor the temperature of our walk-in chiller and freezer room round the clock. With the added data logging features, it certainly help us in maintaining a good temperature data record independently for each of our walk-in cold room without having to record the temperature manually nor using a data logger to manually download the data. It's all being automatically saved on our computer.

Now we can manage all our walk-in cold rooms' temperature with just a phone call and will be able to ascertain the temperature of any room anytime. There are cases when the temperature of our cold room goes above the limits, and the VM500 SGP immediately detected it and call us on our mobile phone. This indeed saves us time and money and we could have a peace of mind without having to worry about our cold rooms' temperature anymore.

The installation was done professionally and the after sales service was indeed remarkable.

I truly recommend this system to anyone who have problem monitoring their cold equipment temperature.

Sincerely yours,

Manmeet Singh
