To whom it may concern:

At the request of Mr. Eric Lim, Director of Spurtronic Pte Ltd, I have been asked to prepare this letter endorsing their product, Temperature Monitoring & Voice Call Alert System, Model VM500-5 SGP.

We have been using this system since August 2005 and this system has proven to be able to monitor the temperature of our walk-in chiller and freezer round the clock. With the added data logging features, it certainly helps us to maintaining a good temperature data record independently for each of our walk-in cold room without having to record the temperature manually nor using a data logger to manually download the data. It's all being automatically saved on our computer.

Now we can manage all our walk-in cold rooms' temperature with just a phone call and will be able to ascertain the temperature of any room anytime. There are cases when the temperature of our cold room goes above the limits and the VM 500 SGP immediately detected it and call us on our mobile phone. This indeed saves us on time and money and we could have peace on mind without having to worry about our cold rooms' temperature anymore.

→ The installation was done professionally and the after sales service was indeed remarkable. With the confident on the product, we decided to purchase another set of VM 500-5 SGP on April this year.

I truly recommend this system to anyone who have problem monitoring their cold equipment temperature.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Leong Eng Chai".
